

Script

In bedroom:

Michiel:

Wakes up

Showers

Eating breakfast

Brushes teeth

Going to school

In school:

Michiel:

We have arrived at my school, where most of my time as an IT student is spent.

Now I' ll show you what I' ve worked during this subject.

-shows task/labo that I' ve worked on-

I' ll see you this afternoon when I' ve got IT again.

At this moment the database lesson is about to start. I' ll be working in group on a GIP task where we have to build a database from scratch.

After this lesson I' ll be heading home by bus.

At home:

I' ll take a short brake before I' ll start my homework which most of the time is not much.

-clip of break and working on homework-

Has dinner

I finished my homework (says what I did). Now it' s time to relax and watch some video' s.

Around midnight

I' ll go brush my teeth and get ready to go to sleep.

Welcome to my day in the life as an IT student. My name is Michiel Van Den Bempt, I' m 17 y/o.

At around 7 in the morning my alarm goes off.

As soon as I get out of bed I' ll go shower, and afterwards have breakfast, pack my bag and brush my teeth.

Here I' m using a shortcut I made myself to check which books I need to bring today.

I study at Immaculata in Oostmalle. I chose this school because of the course IT and Networks and my interests for technology and computers.

Some of the things I have achieved this school year in class or at home are setting up a Wi-Fi-network, dis-assembled and assembled a laptop and speaker, made a website and more.

When I' ve brushed my teeth and put on my shoes I' ll catch a bus to school. I' ll arrive around 15 past 8.

I have arrived at school I will just be showing you the IT lessons .

Today we are learning about TCP/IP ports and which ones are static and which random.

In the afternoon I' m heading home my bus .

I have arrived at my house and took a short break now I' m going to work on a task I have got for IT.

Just finished the task and the rest of my homework. Most of the time when I finished my homework I' ll just be surfing on the internet looking things up.

Then around 7 pm I' m having dinner.

After that I' ve got time to watch tiktok or a movie until I get ready to go to bed.

And that is the end of my day as an IT student.
